

Economic Growth Region 10

Statistical Data Report for August 2014, Released October 2014

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were generally little changed in August. Twenty-four states and the District of Columbia had unemployment rate increases from July, 15 states had decreases, and 11 states had no change, the U.S. Bureau of Labor Statistics reported. Forty-five states and the District of Columbia had unemployment rate decreases from a year earlier, three states had increases, and two states had no change. The national jobless rate was little changed from July at 6.1 percent but was 1.1 percentage points lower than in August 2013.

Georgia had the highest unemployment rate among the states in August, 8.1 percent. North Dakota again had the lowest jobless rate, 2.8 percent. In total, 17 states had unemployment rates significantly lower than the U.S. figure of 6.1 percent, 8 states and the District of Columbia had measurably higher rates, and 25 states had rates that were not appreciably different from that of the nation.

Economic Growth Region (EGR) 10

Clark, Crawford, Floyd, Harrison, Scott, and Washington Counties.

WARN Notices

There are no WARN Notices for August 2014 in EGR 10.

For information on WARN Act requirements, you may go to the U.S. Department of Labor Employment Training Administration Fact Sheet: <http://www.doleta.gov/programs/factsht/warn.htm>

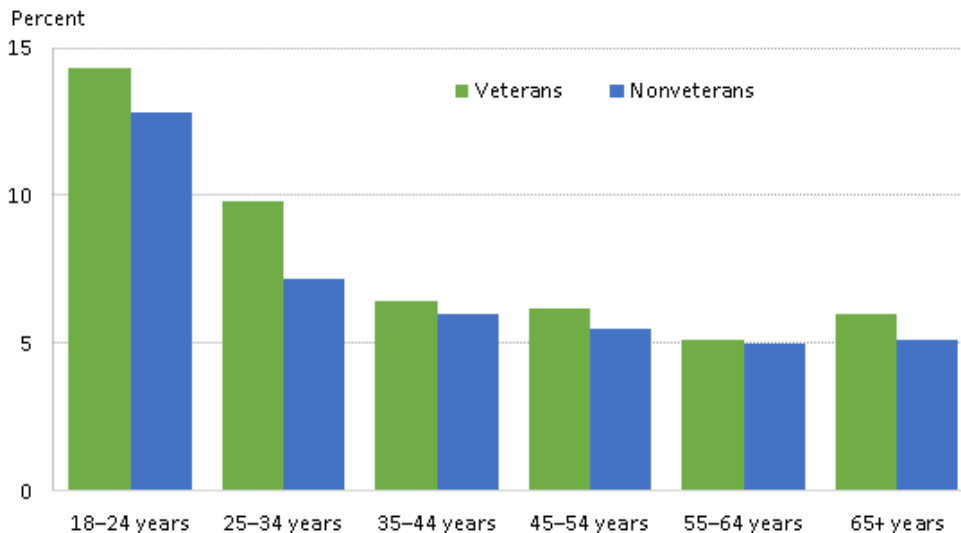

Women veterans ages 25 to 34 had unemployment rate of 9.8 percent in 2013

(Excerpt from the Bureau of Labor Statistics, The Editor's Desk September, 4 2014)

There were 21.4 million veterans in 2013, and 2.2 million of them were women (about 10%). More than half of women veterans served in either Gulf War era I or Gulf War era II. 17% of women veterans had served in World War II, the Korean War, or the Vietnam era, and 30% had served in other service periods, primarily between the Vietnam era and Gulf War era I.

In 2013, unemployment rates for women veterans and nonveterans were similar in most age groups, but the unemployment rate for 25- to 34-year-old women veterans was significantly higher than the rate for nonveteran women in the same age group.

Unemployment rates for women veterans and nonveterans by age, 2013 annual averages

Source: U.S. Bureau of Labor Statistics.

Nearly 100,000 women veterans were unemployed in 2013. Six percent of the 97,000 unemployed women veterans in 2013 were ages 18 to 24. There were about the same proportion of unemployed women veterans in the following groups: ages 25 to 34, ages 35-44, and ages 45 to 54. Women veterans ages 55 to 64 and 65 and older made up smaller shares of the unemployed than their share of the population of women veterans. Unemployment rates for women veterans and nonveterans followed similar trends during the 2006–2013 period, rising and falling in a similar pattern. Rates for both groups rose during the 2007–2009 recession and have declined in recent years, but they have not returned to their prerecession rates.

The unemployment rate for women Gulf War-era II veterans has always been higher than the rate for all women veterans and nonveterans—in part reflecting the younger age profile of Gulf War-era II veterans.
